Alternative Solution Summary Form

This is a summary form to be provided, with attached evidence, to your BCA to assist in demonstrating the compliance of your alternative solution. This form should be provided in tandem with other supporting evidence such as technical product documents, expert opinion or evidence of inservice history. This form is designed to support you in interpreting that evidence to show how it comples with the individual performance requirements of the building code and support the BCA in assessing your proposed alternative solution for compliance. For further guidance on what an alternative solution is and how to demonstrate compliance see Simpli's and [MBIE's Guidance](#).

Name *

First Name   Last Name

Phone Number *   **Email** *

Area Code   Phone Number   example@example.com

Address *

Location where the building work is taking place

Description of Work

Description of the building work covered under the consent

Description of Alternative Solution

Describe the alternative solution covered by this summary. e.g. the product used, the construction method proposed, the construction detail

Building Code Clauses *

Write here the building code clauses the alternative solution is required to comply with

simpli

Performance Requirement	Supporting Evidence	How the proposed alternative solution meets the performance requirement
List here the performance requirements relevant to the alternative solution proposed e.g. E2.3.1	List the supporting evidence attached to this summary form that demonstrates compliance with the specific performance requirement. If applicable refer to specific sections or clauses in the document	Detail here how the supporting evidence demonstrates compliance with the specific performance requirement, this may be as simple as 'refer to expert opinion provided' and as complex as an analysis on how the proposed construction detail meets the 'four D's - Deflection, Drainage, Drying and Durability'.
